Curriculum Vitae

Dawood Sarfraz

About Me

I am **Dawood Sarfraz**, a **Computer Science graduate from FAST National University of Computer and Emerging Sciences**. With a burning curiosity for all things technology, I have developed a keen interest in the fascinating world of Artificial Intelligence.

I am driven by the pursuit of understanding and harnessing the potential of AI to solve complex problems and improve lives. I am an enthusiastic learner, always seeking to expand my knowledge and skills. Moreover, I am open to collaborating with like-minded individuals, as I believe in the power of teamwork and collective efforts to drive meaningful contributions to the field of **Artificial Intelligence.**

I like to train large deep neural networks on large datasets.

My primary areas of interest include:

- ***Artificial Intelligence***
- ***Machine Learning***
- ***Deep Learning***
- ***Natural Language Processing***
- ***Data Science***
- ***Digital Image Processing***
- ***Computer Vision***
- ***Large Language Models***
- ***Reinforcement Learning***

Certificate Name

Figure 1: Certificate in Machine Learning

Learning Outcomes

1. Developed a strong understanding of Artificial Intelligence and its applications.
2. Gained proficiency in Machine Learning algorithms and techniques.
3. Acquired skills in Deep Learning, including training and deploying neural networks.
4. Learned advanced Natural Language Processing techniques for text analysis.http://www.example.com/certificate
5. Mastered Data Science methodologies for data analysis and visualization.
6. Explored Digital Image Processing and Computer Vision for image analysis.
7. Engaged with Large Language Models and Reinforcement Learning for advanced AI tasks.

Natural Language Processing in TensorFlow

Certificate Link: `https://www.coursera.org/account/accomplishments/verify/1W51T16ZDXQ0`

Learning Outcomes

1. Developed a strong understanding of Artificial Intelligence and its applications.
2. Gained proficiency in Machine Learning algorithms and techniques.
3. Acquired skills in Deep Learning, including training and deploying neural networks.
4. Learned advanced Natural Language Processing techniques for text analysis.
5. Mastered Data Science methodologies for data analysis and visualization.
6. Explored Digital Image Processing and Computer Vision for image analysis.
7. Engaged with Large Language Models and Reinforcement Learning for advanced AI tasks.

Certificate Name

Certificate Link: `http://www.example.com/certificate`

Learning Outcomes

1. Developed a strong understanding of Artificial Intelligence and its applications.
2. Gained proficiency in Machine Learning algorithms and techniques.
3. Acquired skills in Deep Learning, including training and deploying neural networks.
4. Learned advanced Natural Language Processing techniques for text analysis.
5. Mastered Data Science methodologies for data analysis and visualization.
6. Explored Digital Image Processing and Computer Vision for image analysis.
7. Engaged with Large Language Models and Reinforcement Learning for advanced AI tasks.
