

Tech Talks & Blogs

I actively watch TED Talks and tech interviews with experts to stay informed about technological advancements and their real-world impact, particularly how innovations in AI and computing can enhance business strategies and drive transformation across industries. My learning is continually inspired by thought leaders and pioneers in the field. Their insights and groundbreaking work have significantly influenced my understanding and approach to artificial intelligence. A few podcasts and interviews are listed below.

In addition, I regularly read and write blogs to reflect on emerging trends, document my learning, and contribute to ongoing conversations within the tech and AI communities.
